

allocate unassigned shards

```
range=2
IFS=$'\n'
for line in $(curl -s 'localhost:9200/_cat/shards' | fgrep UNASSIGNED); do
  INDEX=$(echo $line | (awk '{print $1}'))
  SHARD=$(echo $line | (awk '{print $2}'))
  number=$RANDOM
  let "number %= ${range}"
  curl -H 'Content-Type:application/json' -XPOST http://localhost:9200/_cluster/reroute? -d '{
    "commands" : [ {
      "allocate_empty_primary" :
    {
      "index" : "\"${INDEX}\"",
      "shard" : "\"${SHARD}\"",
      "node" : "tiger-1",
      "accept_data_loss" : true
    }
    }
  ]
}'
done
```
